COURSE DESCRIPTION

The 17th Annual Advances in Oncology program will bring together academic and community oncologists for the purpose of educating participants on the state-of-the-art clinical management of a wide variety of solid and hematologic malignancies. The program is designed to update physicians and other cancer healthcare providers on recent advances and new diagnostic and treatment modalities in hematologic, breast, lung, gastrointestinal, and genitourinary cancers. This course is intended for physicians and cancer health care providers, including medical, surgical and radiation oncologists, nurses, physician assistants, pharmacists and other interested health care professionals. The conference includes didactic sessions from national oncology leaders and case-based panel discussions involving academic and community oncologists.

EDUCATIONAL OBJECTIVES

At the conclusion of this symposium, you should be able to:

1. Discuss advances in prognostic and predictive biomarkers and potential applications in therapeutic decision making.
2. Integrate targeted and traditional therapeutic modalities in the treatment of cancer.
3. Assess newly validated treatment options for patients with solid tumors or hematologic malignancies
4. Apply data from recent clinical trials to determine the optimal course of therapy in defined patient populations, with emphasis on novel agents including mTOR inhibitors, ALK inhibitors, monoclonal antibodies, multi-targeted tyrosine kinase inhibitors, and inhibitors of cyclin kinase 4 and 6, among others.

NEEDS ASSESSMENT

The diagnosis, risk stratification, and multi-modality state-of-the-art treatment of hematologic and solid malignancies are rapidly evolving. The development of molecular prognostic assays and novel targeted therapies provides promising tools for personalized medicine.

As a result of prior course participant evaluations and needs assessment surveys, the need for cutting edge information on prognostic markers and appropriate application of novel therapies has been identified. This year's conference will specifically address these needs in the common malignancies identified by past participants as essential to their practice, including solid and hematologic cancers. The timing of this meeting in the fall allows for the latest findings in clinical cancer research from major hematology and oncology conferences to be presented and discussed. This educational activity also meets a unique need for the Northern California Sacramento Valley to provide a group of networked and collaborating oncologists a forum to discuss the most recent developments in oncology care in the context of local treatment approaches, patient populations, and open clinical trials.

The course is designed to change physician competence in oncology care. State of the art lectures and panel discussions from local and national oncologists will provide ample discussions on the applications and challenges of new prognostic tools and targeted and cytotoxic therapies. Pre-lecture and post-lecture audience response systems (evaluations) will be used in outcome measures.

ACCREDITATION

The Medical Educator Consortium is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

CREDIT HOURS

The Medical Educator Consortium designates this live activity for a maximum of 8.5 *AMA PRA Category 1 Credit(s)*[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

DISCLOSURE

The Medical Educator Consortium (MEC) adheres to the ACCME Standards for Commercial Support. All persons that will be in a position to control the content of the CME Activity are required to disclose all relevant financial relationships. Faculty disclosure forms outlining this information will be made available to all participants prior to educational activity. MEC has also implemented a mechanism to identify and resolve all conflicts of interest prior to the education activity being delivered to learners. The source of all support from commercial interests will also be disclosed to learners prior to the beginning of the educational activity.

NURSING CONTINUING MEDICAL EDUCATION

Continuing Medical Education is acceptable for meeting RN continuing education requirements, as long as the course is *AMA PRA Category 1 Credits*[™], and has been taken within the appropriate time frames.
